

## Ambassador Straight Arm

**Y**our choice in fully upholstered lounge seating when versatility is essential. Available with a selection of (2) additional arm options, the Ambassador is ideal for many types of facilities. Both seat and back cushions are reversible so they can be flipped over when soiled. Fabric seams are triple needle stitched using reinforcing tape on the back side of the seam for strength. All upholstery is applied with heavy duty hook and loop fasteners (Velcro) easily removable for cleaning or replacement. The back cushion has a no-sag spring installed at the base of the cushion to provide ergonomically correct lumbar support. Ambassador is built to last, bolted together using solid steel brackets; your assurance of the Blockhouse guarantee of durability.

## Ambassador Rolled Arm

**T**he rolled arm series features a variation in design that offers a softer more residential look and appeal. Both seat and back cushions are reversible so they can be flipped over when soiled. Fabric seams are triple needle stitched using reinforcing tape on the back side of the seam for strength. All upholstery is applied with heavy duty hook and loop fasteners (Velcro) easily removable for cleaning or replacement. The back cushion has a no-sag spring installed at the base of the cushion to provide ergonomically correct lumbar support. Ambassador is built to last, bolted together using solid steel brackets; your assurance of the Blockhouse guarantee of durability.

## Aries

**T**he appeal of Aries is its contemporary look, with slightly softer lines. The rolled detail design of the front rail combine with the curve of the rounded armrests, creating a very up-to-date style. The back cushion has a no-sag spring installed at the base of the cushion to provide ergonomically correct lumbar support.

Fabric seams are triple needle stitched using reinforcing tape on the back side of the seam for strength. All upholstery is applied with heavy duty hook and loop fasteners (Velcro) easily removable for cleaning or replacement. Seat and back cushions are reversible, extending the life of the seating. Our rigidly engineered frame is bolted together using solid steel brackets, your assurance of the Blockhouse guarantee of durability.

# ENDURANCE ROCKER

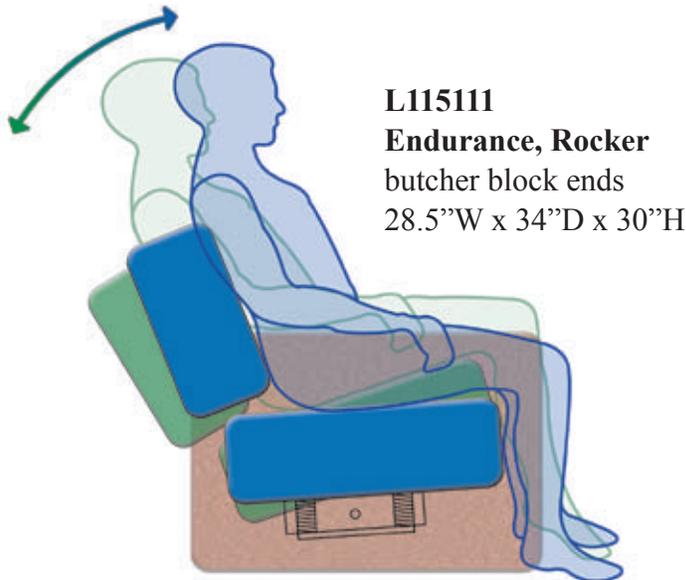

Tested to one million cycles without failure, our Endurance Rocker features a quiet rocker mechanism strong enough to withstand the rigors of institutional use. This rocker is also comfortable, featuring a standard lumbar support and no-sag springs.

The Endurance rocker features our patented Key-Loc®, lock-in, removable fabric, reversible cushion system for the easiest on-site maintenance available. Two convenient cushion positions provide flexibility for different applications. You can quickly and easily adjust and lock-in the back cushion to its upper position for flow-through of debris and liquids or choose a close fit between the seat and back, either way in just seconds. Choose from a wide variety of Blockhouse fabrics or vinyls. The Endurance Rocker meets as a minimum, California Technical Bulletin #117.

#### Endurance Rocker options include:

- Curved back cushion
- Moisture resistant seat and/or back
- foam protection
- California Technical Bulletin #133
- is an available upgrade

**L115111**  
**Endurance, Rocker**  
butcher block ends  
28.5" W x 34" D x 30" H

Our rocker mechanism has been tested to 1 million cycles without failure.

# Integrity

**F**or environments subject to extreme wear and harsh treatment, Blockhouse has developed a truly remarkable new seating system that's tougher than any conventional fabrics you are now using. Roto-Mold is not a fabric or traditional vinyl covering but an integrated cushion system made from durable polyvinyl chloride (PVC). The cushions are not just tough, they're virtually indestructible. PVC is molded around a rigid frame of heavy-gauge steel. The cushions are filled with a dense polyurethane foam designed for long term durability. Integrity seating passes California Technical Bulletin #133 as a standard.

chair	L280101	25½W	29D	30H
loveseat	L280102	47W	29D	30H
sofa	L280103	68½W	29D	30H

## Integrity Features

- Side panels offer the exceptional strength and durability of solid oak butcher block
- Roto-Mold cushions are virtually impervious to liquids and harsh cleaners. Cushions offer on-site reversibility if damage should somehow occur.
- Our exclusive flow-through design (where seat and back cushions meet) prevents hiding of contraband, and allows fluids to flow freely around the cushion, avoiding the accumulation of debris.
- High-density polyurethane foam surrounds the inner framing completely for uniformity in seating comfort and to inhibit foam degradation.
- Cushions are built around a solid inner frame of heavy-gauge steel tubing, and a load-bearing steel septum.

# Safety Support Chair

chair L910201 31w 42½D 45H

shown with standard natural finish

## Safety Support Features

- Key-Loc®, Blockhouse's patented lock-in, reversible, replaceable cushion system.
- Provided with a moisture resistant seat cushion liner.
- Field replaceable arm rests are standard for comfort and support.
- All units have an adjustable flow-thru opening between seat and back cushion.
- Support strap openings strategically placed in side panels, front and back rails. All openings are easy to access and sized for any support strap or other device.
- Anti-tip footrest designed specifically for stability and durability. Footrest locks in extended position and is fully retractable.

shown with standard natural finish

# Silhouette

The **Silhouette** series is engineered for lasting performance. Constructed of solid red oak, this seating series is built for even the most demanding of health care environments. **Silhouette** is also designed for comfort and ease of sitting and exiting the chair. The high, ergonomically correct back cushions provide a comfortable headrest and lumbar support feature. Choose from a wide variety of Blockhouse fabrics or vinyls. **Silhouette** seating features replaceable seat and back cushions and meets as a minimum, California Technical Bulletin #117.
